in @selenap10

Full-stack developer specializing in JavaScript and TypeScript, with a background in web, mobile, and interactive 3D applications. Driven by performance, clean UX, and maintainable code.

Education

Application Designer and Developer

From 2021 to 2023 Wild Code School Lyon, France

- Specialized in full-stack development with JavaScript, TypeScript, Node.js and React
- Completed multiple projects using Agile methodologies and collaborative workflows
- Built REST APIs and responsive front-end applications

Master's Degree – Hypermedia and Intelligent Environment

From 2017 to 2020 University of Savoy Mont Blanc Chambéry, France

- Designed and developed interactive digital systems in virtual and augmented reality using Unity
- Focused on UX/UI design, interactive content creation, and transmedia storytelling
- Master's thesis: "The role of imagery in animal exploitation: Perceptions from L214 protests against animal exploitation."

Bachelor's Degree: Book and Multimedia Studies

From 2014 to 2017 University of Clermont Auvergne Clermont-Ferrand, France

- Trained in digital tools (HTML/CSS, Adobe Suite), communication and cultural project design
- Focus on digital media production, heritage mediation, and editorial content
- Included class in advanced English and digital communication

Work experience

Full stack web developer

Since Apr. 2026 Gedeon Lyon

- Development of accessible interfaces (React, Next.js) and integration of REST APIs via SWR, in accordance with the design system
- Backend services using Express.js and AWS (Lambda, S3, CloudWatch); MongoDB / Mongoose data management
- Unit and integration testing, code reviews, and contributions to service-oriented architecture

Full-Stack Developer 3D

From Mar. 2022 to July 2025 Decq Saint-Priest, France

- Developed a production-ready online 3D configurator using Vue.js, Three.js, TypeScript and PHP
- Created interactive components and integrated real-time 3D rendering
- Improved UX and code scalability in close collaboration with the design team
- Delivered a stable, modular platform used by industrial clients
- Key achievement: final deliverable put into production, designed from start to finish with a maintainable front/back architecture.

Virtual Reality Designer

From Feb. 2019 to Mar. 2019 University of Savoy Mont Blanc Chambéry, France

- Built a VR prototype in Unity (C#) for a PhD research project
